

BETA Laboratory provides extensive Measuring and Test Equipment (M&TE) calibration services for all industries. Our calibration laboratory offers a full-service program designed to help you meet the strictest quality assurance requirements, including ANSI Z540-1, ISO 9001, ISO 17025, nuclear and military. Diverse calibration capabilities range from rugged field use equipment to high accuracy lab standards with results traceable to the National Institute of Standards and Technology (NIST). Our highly experienced technical staff has the skills, knowledge and resources necessary to help meet your business challenges.

Metrology Capabilities

Torque Calibrations

- Torque Wrenches
- Torque Multipliers
- Hydraulic Torque Wrenches
- Torque Standards
- Special Calibration for Motor and Air-Operated Valve Diagnostic Equipment

Pressure Calibrations

- Gauges
- Transducers
- Calibrators
- Barometers
- Vacuum and Absolute Pressure Instruments
- Pressure Standards

Electronic and Electrical Calibrations

- Multi-meters
- Resistors/Decade Boxes/Shunts/Recorders
- Oscilloscopes
- Frequency Counters
- Current, Frequency and Voltage Devices
- Electronic/Electrical Standards
- Tachometers
- Stopwatches/Timers

Dimensional Calibrations

- Inside Micrometers
- Outside Micrometers
- Depth Micrometers
- Vernier Calipers
- Dial Calipers
- Dial Indicators
- Wire Crimpers – including Hydraulic Types

Gas Flow Calibrations

- Mass Flow Transducers
- Leak Rate Monitors
- Rotameters

Temperature and Humidity Calibrations

- Thermometers
- Temperature Sensors
- Recorders
- Hygrometers
- Environmental Testing
- Temperature and Humidity Standards

Vibration Instrumentation Calibrations

- Accelerometers
- Analyzers
- Velocity Sensors
- Seismic Monitoring Equipment

BETA Laboratory and Technical Services
