Located in Springdale Township, Springdale Generating Facility includes Springdale 1&2 simple-cycle natural gas generating units with a total capacity of 88 megawatts and Springdale 3, 4 & 5 combined-cycle generating units with a total capacity of 550 megawatts. Springdale 1&2 began operation in 1999, and Springdale 3, 4 & 5 went into service in 2003.

Springdale 3, 4 & 5 operates as an around-the-clock, reliable generating source producing enough electricity to power more than half a million homes.

Because Springdale uses natural gas as its fuel and is equipped with state-of-the-art technology, its emission rate is significantly lower than other types of fossil fuel generating facilities. Springdale employs 20 people and contributes more than $220,000 in annual property taxes.

In 2015, FirstEnergy invested in significant reliability upgrades for Springdale Units 3, 4 & 5 to ensure they operate dependably for years to come.

FirstEnergy is a diversified energy company dedicated to safety, reliability and operational excellence. Its 10 electric distribution companies form one of the nation’s largest investor-owned electric systems, serving customers in Ohio, Pennsylvania, New Jersey, West Virginia, Maryland and New York. FirstEnergy operates one of the nation’s largest, cleanest and most diverse generating fleets, with a capacity of nearly 17,000 megawatts.
