The proposed transmission line is needed to provide redundancy in the area and to ensure reliable long-term services to customers in the surrounding territory. The entire length of the proposed route is approximately 9.1 miles and will utilize 100-feet of an existing generally 200-foot-wide right-of-way. The Project will be constructed to double circuit to accommodate the new circuit and the existing circuit. Upon completion, the existing wood pole line will be removed. The route traverses through Highland, Franklin, Butler, Cumberland and Straban Townships, in Adams County, Pennsylvania.
