Metropolitan Edison Company Estimated Price-to-Compare Sample Calculations For Illustrative Purposes ONLY

Introduction:

The purpose of this document is to provide suppliers with an understanding of how the Price-to-Compare ("PTC") is calculated for all customer classes, pursuant to the Pennsylvania Public Utility Commission's ("PA PUC") Secretarial Letter issued on October 12, 2010. The data contained herein provides estimates of the PTC and reflects only a snap-shot in time.

The calculations of the PTC estimates are based on actual and estimated values. The auction results are based on the results of the completed default service supply solicitations. The E Factor Rate is based on the actual over/under-collection balances for the prior rate period.

Disclaimer:

It should be noted that any and all data within this document are estimates, and actual charges will vary depending on customer demand, seasonal variations, or other factors. Forecast data is subject to change due to migration, customers leaving the Company's service territory, or other events. In addition, all possible combinations of rates and surcharges have not been included in this document. The Company is not liable for any losses which may result from using the information contained in this document.

Metropolitan Edison Company Estimated Price to Compare Default Service ("PTC") Rider Rates - Residential Class For the Default Service Period December 1, 2023 through May 31, 2024 For Illustrative Purposes ONLY

Line Item Explanation for the Residential Procurement Class PTC Calculation

Lines 1-4 - The results of each default service auction conducted for the applicable PTC rate period

Line 5 - The total number of tranches procured and weighted average price per MWh and per kWh

- Line 6 Average line loss factor for the procurement class
- Line 7 Loss adjusted auction costs per kWh
- Line 8 Administrative costs associated with providing default service to the procurement class per kWh
- Line 9 The current cost of providing default service to the procurement class per kWh
- Line 10 Gross Receipts Tax (GRT) Gross-up factor
- Line 11 The current cost of providing default service to the procurement class per kWh, including GRT
- Line 12 Prior period (Over)/Under Collection being collected in the current rate period per kWh, including GRT

Line 13 - Total PTC Rider Rate per kWh

Metropolitan Edison Company Estimated Price to Compare Default Service ("PTC") Rider Rates - Commercial Class For the Default Service Period December 1, 2023 through May 31, 2024 For Illustrative Purposes ONLY
