General Service Electric Rates

Effective July 1, 2026

General Service

This pamphlet was prepared to help you better understand your bill for electric service and our rates for this service. It shows the rate schedules that are applicable to our major classes of customers and illustrates how a bill is calculated.

You Have a Choice

Basic Generation Service (BGS) is JCP&L's price to compare. Basic Generation Service may vary depending on rate class and seasonal rates. The price to compare is the sum of the BGS Energy Charges, the BGS Transmission Charges and the BGS Reconciliation Charge, which are located under the "Charges from JCP&L" heading on page one of your bill. To save money, you must buy your Basic Generation Service from an electric generation supplier at a price THAT IS LESS THAN JCP&L's price to compare.

Example

GS-General Service Secondary Voltage

This example is for single-phase commercial and industrial customers without any special provisions or riders. Add \$12.04 to the monthly customer charge for three-phase service.
