

The ABCs of shopping

for an electricity supplier

A. Always Start with Your Price to Compare

This insert contains the current Met-Ed prices to compare by rate class. The price to compare is the price per kilowatt-hour (kWh) you pay for electric generation and transmission. It does not include the other costs on your monthly bill. You can use this figure to compare prices from different electric suppliers. Your price to compare changes quarterly. Updates to the price to compare will be reflected on your bill.

To find your rate class, look under the "Charges from Met-Ed" section of your monthly electric bill. Your bill also contains a Usage Comparison graph that shows how much electricity you've used each month. You can use this to determine your average monthly usage.

B. Be Sure to Tap Your Resources

For more information, log on to the Pennsylvania Utility Choice website, www.PAPowerSwitch.com. You also can call Met-Ed's Retail Choice Center at 1-888-478-2300 for a free "How to Shop" guide and a list of suppliers serving your area. You can get detailed information on suppliers and their prices from the Pennsylvania Office of Consumer Advocate at 1-800-684-6560 or www.oca.state.pa.us.

C. Choose with Confidence

Whether or not you choose a new electricity supplier, Met-Ed will continue to deliver safe, reliable electric service to your home or business.

Met-Ed Prices to Compare*
through August 31, 2016.

Residential Rate Classes

Residential (RS)

5.945 cents per kWh

Non-Residential Rate Classes

General Secondary – Non-Demand Metered or GS-Small

6.916 cents per kWh

General Secondary – Demand Metered or GS-Medium

6.916 cents per kWh

Municipal Service (MS)

6.916 cents per kWh

*Your price to compare changes four times per year. Please check the "Messages" section of your bill each month to find your current price to compare.
