BILLING ADDRESS	CITY	STATE	ZIP CODE
CONTACT PERSON NAME		PHONE NUMBER	
3RD PARTY AFFILIATE (CSP, VENDOR, ETC.)			

\* Potomac Edison will be responsible for the installation of the Digital Cell communication link to the interval meter location. Customer may be charged additional expenses to install external antenna due to low signal strength. All orders for interval meters must be made by the customer at the business location.

<b>INTERVAL METER / PULSE OPTIONS AND CHARGES</b>
The end-use customer may choose from the following standard interval meter installations. However, the type of interval meter chosen by Potomac Edison must meet the billing and metering requirements of the tariff(s) under which the customer is taking electric service. The actual amount charged may be different from the below stated prices if the installation varies from the standard installation due to the customer's existing metering configurations.
<b>NOTE: This service is only available for locations where digital cell service is available. Pulse only installations do not require digital cell service. If multiple devices exist, chosen option (below) will apply to all devices listed on the account, unless otherwise specified.</b>

INTERVAL METER (PULSE) OPTIONS	TYPICAL COST	PLEASE MARK SELECTION	FOR INTERNAL USE COST CENTER NO. (462226)

Please Read Terms and Conditions Below, Sign & Date Work Order

Please allow 4 to 8 weeks for the installation of the new digital interval meter / pulse outputs. Customer will have an additional line item on their bill for work to be completed by Potomac Edison. Installation times may also be extended based on elements beyond the control of Potomac Edison (Weather, Emergency Service Restoration Efforts, Meter Availability, etc.) The external antenna may not be an option in all cases due to low signal strength or when site specific electromagnetic interference exists.
